manooi

About Manooi.

Our aesthetic vision for Manooi is inspired by the natural light around us. As we design and manufacture custom-made crystal chandeliers our goal is to re-create this pleasing and, positive natural light within architecturally created indoor spaces. Crystal is a beautiful material and over the years we witness a continuously growing fondness in working with it. We hope to bring this joy to you and your environment as we ultimately believe that good design should make the world around us a more beautiful and harmonious place to live.

Manooi was founded by the artist/designer couple János Héder and Judit Zoltai. The studio where the creations are designed have been operating under their joint supervision ever since. János is the lead designer for Manooi. After receiving his degree in architecture and interior design, János founded an architecture studio and within a few years Manooi Light Creations. The brand's debuting presence enjoyed such success that Manooi's first international clients are now regular customers. Many of them being art lover individuals and their demand for a more personal design led us to develop our unique, one-of-a-kind crystal chandeliers in exciting new shapes, colours and innovative materials.
